Junior Developer

Pursuing a career in software engineering with over three and a half years of programming experience. Earned multiple technical certifications in web technologies. Passion for software development, paired with a curious and self-directed learning approach, aligns with programming's demand for continuous growth.

Skills

- Assertive communication
- Attention to detail
- Tailwind CSS / MongoDB / PostgreSQL
- Time management
- TypeScript / React
- NextJS / NestJS

Education

Bachelor's Degree in Software Development

Anticipated 2026

Brigham Young University

- Currently studying software development at BYU-Idaho online, all credits and courses are taken according to own schedule and time, does not interfere with any other job-related activity.

Experience

Project Coordinator

2023-2024

Horizon Interactive

- Managed and coordinated a team of 6 technicians in California, U.S.
- Completed critical delayed solar panel projects installations in less than 48 hours, getting necessary permits and documentation and schedule inspections with cities.
- Saved over \$30K on chargebacks per finished project and presented financial reports.

Scheduling Specialist

2022-2023

Oclinicals

- Reached out to 60+ patient per day, completing and updating charts on health history, allergies, and insurance.
- Collaborated with a team of schedulers to fill and manage 13 different doctor's agendas in clinic's gastroenterologist unit.

Web Researcher

2021-2022

SPI Technologies

- Processed and updated more than 30 profiles of high-risk, important and politically exposed people in a large internal data base.
- Developed and implemented a system containing manuals and guidelines and made easier and intuitive it's access, improving case handling time per agent.
